

BULGARIA RECEIVED FULL MEMBERSHIP STATUS IN THE EUROPEAN INFRASTRUCTURE FOR TRANSLATIONAL MEDICINE EATRIS-ERIC

EATRIS - ERIC (<https://eatris.eu/>) is a pan-European consortium bringing together over 100 leading scientific and academic institutions in Europe, created to accelerate the process of translating research findings into innovative strategies and approaches for disease prevention, diagnosis and treatment. In 2018 and 2019, Bulgaria has undertaken formal steps towards accession and membership, stating the intent to designate and authorize a Bulgarian node linked to EATRIS-ERIC.

The Full Membership status of Bulgaria in the European Consortium was formalized with the financial support of the Ministry of Education and Science and the decision of the Board of Governors and the Board of National Directors of EATRIS-ERIC officially announced on July 9, 2019. The membership of Bulgaria entitles to its representatives in the Managing Boards of EATRIS-ERIC voting rights by defining strategies and policies in the field of translational medicine. The Bulgarian scientific community is given the opportunity for full access to product platforms, scientific and technological expertise and services, participation in pan-European projects and public-private partnerships, etc.
