

WE CONQUER CHALLENGES. WE CREATE JEWELRY. WE CHOOSE BEAUTY.

The origin of the family-owned "Biju-03" goes back to the factory "Petrov" for mass production of jewelry, located in Sofia, Bulgaria. In 1933 Nikola Petrov settled in Germany where he acquires title jeweler at factory "Moreno." Later he returned to Bulgaria and in 1935, together with his brothers, established the first factory in Bulgaria for the production of jewelry products, known as factory "Petrov". Over time, their reputation as producers of mass jewelry increased and they became known for their products in Germany and Bulgaria.

Three generations have contributed to the strengthening of its own traditional production line of jewelry and similar articles of precious metals. Today Biju-03 is characterized by long experience handed down from generation to generation. We are proud with our high technical and aesthetic quality of the products. We have complete production equipment for jewelry manufacture and machine jewelry chain. We have all the necessary modern technology for manual and computer 3D modeling, which makes it possible to realize any design.

For us nothing is impossible in the art of making jewelry, from concept (drawings, sketches, photographs) to final touch in creating jewelry.

We launch beauty. We create concept and design.
