

EACVI Teaching Course

**ADVANCE MYOCARDIAL FUNCTION IMAGING IN CLINICAL PRACTICE:
FROM DOPPLER TO DEFORMATION STATE-OF-THE-ART IN 2014**

3-5 April, 2014

Kempinski Hotel Zografski, Sofia, Bulgaria

Bulgarian Society
of Cardiology

Dear colleagues,

On behalf of the Bulgarian Working Group on Echocardiography in close collaboration with the European Association of Cardiovascular Imaging, it is our pleasure to welcome you to the EACVI Teaching Course, 3-5 April 2014, in Sofia, Bulgaria.

Internationally-recognized experts will provide in-depth lectures and hands-on sessions on tissue Doppler, Doppler-and speckle-based strain and strain rate imaging, as well as three-dimensional deformation analysis will educate the course participants in all facets of image acquisition, functional analysis, and important clinical applications in both children and adults with congenital and acquired heart disease.

Working language of the course is English. Simultaneous interpretation will be available.

There are only limited seats for the course. Register fast to avoid disappointment.

For future information and registration please contact our partner Company for International Meetings Ltd.

Please join us and share your vision and ideas, and participate in promoting excellence in diagnosis, research, education and technical developments in cardiovascular ultrasound and other imaging modalities in wonderful spring atmosphere in green Sofia and Bulgaria.

Sincerely yours,

Dr. Krasimira Hristova, PhD
